Trumpet, Cornet and Brass Instrument Stand

The DEMAND Instrument Stand was designed as an aid to help those with limited strength and or dexterity to play a variety of brass instruments. The stand uses a simple clamp mechanism to securely grip the instrument. This also allows a variety of instruments to be played one handed. The lightweight monopole supports the weight of the instrument and can be shortened for transport and

Trumpet, Cornet and Brass Instrument Stand

Remember this design is totally open source, meaning you are welcome to alter the design to suit your needs. The Instrument Stand consists of a photography monopole with a camera clamp attached on the end.

All the components are available from photography shops or alternatively if you're happy to shop online Amazon and ebay are excellent resources.

Always be careful not to over tighten the clamp when attaching your instrument.
